Led by landscape photographer and outdoor educator Meredith Fontana, this course simplifies and demystifies focus stacking for landscape photographers of all levels. Here's what you'll learn:

- Creating incredibly sharp images using a series of exposures with different focus points.
- Fundamentals of focus stacking, including optimal camera settings and when to apply this technique.
- Two effective methods to export photos from Lightroom to Photoshop for focus stacking incorporate Adobe Bridge and Adobe Camera RAW.
- The straightforward approach to focus stacking using Photoshop's auto-blend.
- Focus stacking using layer masks.
- Basic edits to a focus stack in Lightroom and Adobe Camera Raw.
- Advanced focus stacking techniques, including incorporating exposure blends, time blends, and long exposures.
- Troubleshooting and fixing focus stacking errors in Photoshop.

This course is designed for:

- Landscape photographers and enthusiasts at all skill levels.
- Those looking to enhance photography through post-processing techniques.
- Beginners seeking an introduction to focus stacking.
- Intermediate photographers familiar with Lightroom and Photoshop basics.
- Advanced photographers aiming to deepen their focus stacking expertise.

Requirements for the course:

- Adobe Lightroom Classic and Photoshop are downloaded on your computer.
- Basic understanding of Lightroom Classic, including navigation and using the developed module.
- Basic understanding of Photoshop and working with tools and layers.
- Familiarity with Photoshop layer masks is helpful but not mandatory.
- No prior knowledge or experience with focus stacking is required.
- Optional: Adobe Bridge downloaded on your computer.

 **100% Virus FREE and Safe**
