Designed to streamline motion tracking tasks, GeoTracker enables VFX artists to achieve professional results without extensive tracking experience. Its pin-based system allows effortless manipulation of 3D models within the familiar 2D viewport.

With the ability to estimate focal lengths and handle occlusions seamlessly, GeoTracker ensures accurate tracking even in challenging scenarios. The plugin includes built-in 3D models and supports exporting to various formats, providing a comprehensive solution for motion and graphics design. GeoTracker integrates seamlessly into After Effects, offering a user-friendly experience without the need for learning new interfaces or workflows.
