- Cameras And files: Mastin Labs presets and styles are compatible with camera Producers and raw formats.

The Mastin
Step Workflow

Get clean, true-to-color images you and your clients love.
1. APPLY THE PRESET: This applies a color palette and micro-contrast to your image.
2. ADJUST EXPOSURE: Exposure often needs to be increased because most cameras try to protect highlights on Auto. Exposure times the contrast alone with Tone Profiles.
3. ADJUST WHITE BALANCE AND TINT: This dials in perfect skin tones and fixes white balance/tint biases from the camera. Most cameras don't get this right with Auto White Balance, and
learning white balance adjustments fixes this.
