

## CData Drivers for Zoho Creator v24.0.9111 (11 Dec 2024) All Platforms + License Key

2024-12-18 23:02:00 [label](#) [我要反馈](#) [下载页面](#)

streamline data integration processes by offering robust connectivity between Zoho Creator and various reporting tools, databases, and custom applications. These solutions adhere to industry standards, ensuring effortless integration with BI, Reporting, Analytics, ETL Tools, and Custom Solutions. Accessing live Zoho Creator data becomes seamless across different platforms, providing unmatched query performance and comprehensive access to both data and metadata.

Efficient data movement is facilitated through these integration solutions, supporting ETL, replication, and warehousing tasks. Extend favorite ETL tools with Zoho Creator connectivity, enabling operational reporting, data governance initiatives, disaster recovery, and more. Connect RDBMS or data warehouses with Zoho Creator to optimize performance, support data governance, and facilitate archival processes.

**CData Drivers for Zoho Creator** offer unparalleled simplicity in managing Zoho Creator data, supporting popular database protocols like ODBC, JDBC, and ADO.NET and wire-protocol interfaces for SQL Server and MySQL. Integration with data migration, ESB, iPaaS, BPM tools, and developer technologies is seamless, streamlining workflows and automating processes. Developers benefit from a data-centric model that simplifies integration, empowering them to build high-quality applications faster. Additionally, virtual database abstraction layers enhance data virtualization, facilitating advanced query federation and delegation for optimized performance.

**This package includes the following components:**

- Excel Add-In for Zoho Creator
- Zoho Creator ADO.NET Provider

- Zoho Creator Data Cmdlets
- Zoho Creator FireDAC Components
- Zoho Creator JDBC Driver
- Zoho Creator ODBC Driver
- Zoho Creator Power BI Connector
- Zoho Creator SSIS Components
- Zoho Creator Tableau Connector

## Key Features of CData Drivers for Zoho Creator :

1. Seamless integration with Zoho Creator and various reporting tools, databases, and custom applications
2. Adherence to industry standards for effortless integration with BI, Reporting, Analytics, ETL Tools, and Custom Solutions
3. Comprehensive access to both live Zoho Creator data and metadata
4. Unmatched query performance for enhanced data retrieval and processing
5. Support for ETL, replication, and warehousing tasks to facilitate efficient data movement
6. Extension of favorite ETL tools with Zoho Creator connectivity for operational reporting and data governance initiatives
7. Connectivity between RDBMS or data warehouses with Zoho Creator for optimized performance and data governance
8. Support for popular database protocols like ODBC, JDBC, and ADO.NET, as well as wire-protocol interfaces for SQL Server and MySQL
9. Seamless integration with data migration, ESB, iPaaS, BPM tools, and developer technologies
10. Simplified management of Zoho Creator data for developers, enabling faster application development
11. Virtual database abstraction layers for enhanced data virtualization, supporting advanced query federation and delegation for optimized performance.
