

Aescripts Mask Prompter v2.2.3 (Win, Mac)

2025-02-10 16:37:17 [label](#) [我要反馈](#) [下载页面](#)

Aescripts Mask Prompter: Mask Prompter is a new method of making mattes. Use points and boxes to find and create mattes in black and white and alpha channels to represent objects in your footage.

How to use Fix link masked deletion bug in plugins?

You can use Aescripts Mask Prompter.

Where can I download the product?

After subscription, You can download it for free from here.

Compatibility:

It works on the AE 2022 or higher version. Test your configuration with the trial version for free before buying.

Limitations:

- GPU mode isn't the same as CPU mode.
- On Windows, An Nvidia GPU is required for the GPU version of the plugin.

New Changes:

- Move the installer payload to a more stable server. No functional changes.
- **Simple workflow** - The matting process is straightforward. Make sure you specify rectangles and points on the object. Mask Prompter creates a matte based on your request. This lets you select your subject with greater precision, improvement, and simple tracking.
- **Interactive** - We have added custom extensions to the AI so that you'll receive interactive prompts. Be aware that the performance will depend on the hardware you use.
- **Video of Stable!** - It's easy to achieve reliable results with video. The river's matte to the right was made using only one point over the stream!
- **Multiple output options** - Make your mattes available as overlays to display, as a black-white matte, or as content with a transparent alpha channel. This allows for various integration into your workflow and in conjunction with other effects.

How to install

1. Install the plug-in program MaskPrompter-v1.10.1.exe. If you need to install the GPU version, please check Install gpu... If not, it will be the CPU version.
- (*The GPU version renders quickly, but may not be as stable as the CPU version. (The GPU version plug-in requires an Nvidia discrete graphics card))
2. During the installation process, you need to download the module online. Please wait for the download to complete. It may take a while to download.
3. Copy MaskPrompter.blaceplugin to the following path:
C:\Program Files\Adobe\Common\Plug-ins\7.0\MediaCore\MaskPrompter

Plug-in usage location: In Effect-Blace plugins-Mask Prompter

What is Aescripts Mask Prompter?

Mask Prompter is a script developed by Aescripts, designed to assist with creating mattes or masks in video footage,

Plugins

AeScripts

particularly for black and white and alpha channels.

This script seems to simplify the process of creating masks and mattes, which are essential for compositing and various visual effects tasks in video editing and compositing software like Adobe After Effects. By using points and boxes to define areas of interest likely streamlines the process of creating precise masks or mattes, saving time and improving accuracy in post-production work.
