Vera Product Light Addon - Blender Market v1.0.0: This Addon is not in need of any introduction as it's simple, **the Vera Product Lighting Studio** is an addon that focuses on the lighting of your Object which could include things such as automobiles, Electronics, Human Models and more. You are not required to do lots of things, simply select the one you want to use and you will have a great lighting scene in just a few seconds.

What sets this addon apart in comparison to other addons is that it doesn't just provide Light Objects in addition to providing Grounds to your Subjects. Therefore, you don't need to think about setting up your scene. Simply select a preset and continue

Get Started

Before you can light your product with this addon, first, remove any objects that are lit within your scene. Then apply the preset you would like to rotate, move it to your preferred spot and take in the View

Choose one Light Object, tweak the Color and Radius to suit our needs You can also create any object to Glow or alter the settings for any Glowing Object
