### Sharp, TOUGH, AND ON THE Mark EXPRESSED WEAPONS

The sound of the SILENCERS is for the very elite category of people: The **silencers**, and they are the **specially trained agents** as well as the hitmen, those in the **Special Forces, hunters, snipers**, and everyone whose work is to be silent. However, they must be presented with conviction and with the highest quality of sound. You, as an audio engineer, are the one who will be able to make it happen.

## Gfx plugin details of Boom Library SILENCERS

The product is in the **SOUND EFFECTS** category, for more information about this post you can click on the home page link in the sidebar.

SOUND EFFECTS

平面设计

The SILENCERS DESIGNED gun sounds come to pre-designed "ready-to-use" SFX. The sounds are perfectly blended and silenced gun sounds to conserve your time and energy in critical projects that require a lot of time. Every weapon shot comes with three distinct styles.

3 Categories of four-shot variations

MECHANICS Its sound emphasis is on the mechanism that controls the weapons. The sound is clear solid, uncompromising, and extremely near. REALISTIC: This one is for the most ardent fans. The most authentic and balanced sound of the weapon in suppression.

RICOCHET It is the most distinctive version. It is the most typical high-frequency blast of a suppressed weapon shot.

Ready-to-use COMBINED SHOTS

The DESIGNED version also includes videos of automatic shooting as well as amazing gunfire bursts. All muted, of course, by SilencerCo suppressors. SilencerCo suppressors.
