

Blender Market – Realwater v2.0 – Water Shader Addon 1.1.0

2025-02-10 16:49:48 label 我要反馈 下载页面

BM – Realwater v2.0 – Water Shader Addon 1.1.0: Cycles are required to show the full effect, and Eevee can't show the full effect.

This node was built using Blender 3.4.1 and might not be compatible with earlier versions.

New Changes:

- Major upgrade to the interface for plugins - You can now alter the shader effect without using the node editor.
- Four new presets been added to the blue-tear effect (colors can be altered)
- We introduced a new shader designed for ocean scenes (with an underwater-inspired bubble geometry with nodes).
- A brand new Node with foam effects (This new node replaces the old "Wave Shader")
- Addition of RealWater Eevee version. New Eevee version shader that has four dedicated presets
