

CData Drivers for MYOB AccountRight v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:04:00 [label](#) [我要反馈](#) [下载页面](#)

CData Drivers for MYOB AccountRight offer seamless integration and bi-directional data connectivity for a wide array of purposes, including Business Intelligence (BI), analytics, data management, and workflow automation. These drivers empower users to easily access live MYOB AccountRight data and metadata from various applications and tools, facilitating informed decision-making processes.

In the realm of BI and analytics, these drivers provide unmatched query performance and comprehensive access to MYOB AccountRight data, enabling integration with reporting and data visualization technologies. They streamline the connection between favorite analytics tools and real-time MYOB AccountRight data, enhancing data-driven insights.

Furthermore, developers benefit from simplified integration with MYOB AccountRight, as these drivers offer a data-centric model that accelerates application development. Additionally, these drivers support popular database protocols, ensuring compatibility with a wide range of database management applications for efficient data management. Whether for ETL, replication, workflow automation, or developer needs, provide robust, reliable, and secure data movement and access.

This package includes the following components:

- Excel Add-In for MYOB AccountRight
- MYOB AccountRight ADO.NET Provider
- MYOB AccountRight BizTalk Adapter
- MYOB AccountRight Data Cmdlets
- MYOB AccountRight FireDAC Components
- MYOB AccountRight JDBC Driver
- MYOB AccountRight MuleSoft Connector

- MYOB AccountRight ODBC Driver
- MYOB AccountRight Power BI Connector
- MYOB AccountRight SSIS Components
- MYOB AccountRight Tableau Connector

Key Features of CData Drivers for MYOB AccountRight :

1. Seamless bi-directional data connectivity
2. Easy access to live MYOB AccountRight data and metadata
3. Unmatched query performance for BI and analytics
4. Comprehensive integration with reporting and data visualization technologies
5. Extension of ETL tools with MYOB AccountRight connectivity
6. Reliable data movement for replication and warehousing
7. Support for operational reporting, performance optimization, and data governance
8. Compatibility with popular database protocols like ODBC, JDBC, and ADO.NET
9. Integration with workflow automation tools like BizTalk, MuleSoft, and Microsoft Flow
10. Simplified application development with a data-centric model
11. Virtual database abstraction for enhanced query performance and data accessibility.
