

20 Dreamy Haze Lightroom Presets and LUTs

2025-02-10 16:38:17 [label](#) [我要反馈](#) [下载页面](#)

20 Dreamy Haze Lightroom Presets and LUTs: "Lost in a Dreamy Haze, you'll find your way," according to the old phrase. And that's precisely the result these Lightroom presets offer. Cover your videos and photos in a dreamlike atmosphere with soft colors and an airy feeling. These presets are great for adding a magical look to your portraits or for enhancing the natural beauty of your photos, and they can help your photos create a narrative that feels like an enchanting dream.

Adobe Photoshop Lightroom for MobilePreset Instructions

Presets for Lightroom Mobile are installed through Lightroom on your desktop. Once installed, they will sync to your mobile device.
Important: You must have an active Creative Cloud subscription to sync presets.

Step 1- Open Lightroom on your desktop. Go to File > Import Profiles & Presets. Navigate to the product folder. Load the Lightroom CC\Dreamy Haze.zip file.

Step 2- After loading the presets on your desktop, they should automatically sync to Lightroom Mobile on your mobile device. To check the sync status, click on the cloud button

Step 3- Open Lightroom Mobile on your mobile device. It may take a moment for the presets to sync. To check the sync

status, tap on the cloud button.

Step 4- In Lightroom for Mobile, choose a photo to edit then tap the Presets button.

Step 5- Tap on the dropdown menu and select Dreamy Haze. Tap on the preset to preview the look. When you're ready, tap the checkmark button on the top-right of the interface to apply the preset

Step 6- To adjust the amount/opacity, tap on the Profiles button Adjust the slider to adjust the profile amount.

Adobe Photoshop LUT Instructions

Using LUTs in Photoshop lets you apply the look on a separate layer. However, it lacks tonal settings and effects (ex. grain and vignette) that presets for Lightroom offers.

Step 1- From the Adjustments panel (Window > Adjustments), add a Color Lookup adjustment layer.

Step 2- Click on the Load 3D LUT... dropdown menu then choose Load 3D LUT. Navigate to the product folder. Load a LUT from the LUTs\CUBE folder.

Step 3- To change the opacity, adjust the opacity setting in the Layers panel (Window > Layer)
