Inear Display Litote v1.5 (Win, Mac)

2025-02-10 16:37:17　　label 我要反馈　　下载页面

Inear Display Litote v1.5 is a versatile audio effect plugin available for both Windows and Mac.

How to turn any sound into a captivating texture?

You can use "Inear Display Litote".

It transforms sounds into captivating textures using four distinct audio engines combined through an XY pad, allowing for extensive sonic variation.

Key features include a smart randomizer for instant patch creation, an Engine Editor for detailed texture crafting, and a Trajectory Mode that autonomously navigates through granular soundscapes for evolving audio effects.

"Inear Display Litote" Samples:

Additional functionalities include granulators, resonators, diffusion delays, individual engine parameter editing, and extensive control options such as lock channels, amplitude controls, dry/wet mix, global and engine-specific randomizers, and more.

The plugin supports macOS 10.13+ (Intel or ARM) and Windows 10+ (64-bit), with VST3 and Audio Unit compatibility.
