

Bluezone Corporations – Deadspace – Sci Fi Ambiences, Drones and Soundscapes

2025-02-10 16:40:47 [label](#) [我要反馈](#) [下载页面](#)

"Deadspace: Sci-Fi Ambiences Drones as well as Soundscapes" contains more than 815 MB of dark cinematic production elements, morphing drones, a wide variety of deep soundscapes, atmospheric drones, desolate drones amazing transition textures, the twisted sound effects of pads. The sound library with a WAV format can be the ideal sample collection for producers who work in the fields of Ambient and Dubstep and Drum and Bass. Cinematic and darker modern Electronica. The sample collection is royalty-free and 100% royalty-free. It was created through Bluezone Corporation, this huge collection weighs over 815Mb, and contains the 96 stereo WAV samples that are available for playback in any of the most well-known samplers. The collection includes an array of complex layers that are processed and twisted hardware sounds. It is now available for download immediately the sample pack is perfect for futuristic, fantasy and science fiction sound effects.

Ginno Legaspi review - SoundBytes Magazine :

With a focus on dark, futuristic soundscapes, Deadspace: Sci-fi Ambiences, Drones & Soundscapes delivers an assortment of bizarre FXs deep soundscapes and deep soundscapes as well as transitional textures and pads, as well as out of this world drones that can aid you in making an ambient soundscape of your own. The library is filled with high-quality, original samples. It's extremely versatile in that it covers the entire area - be it dark ambient drones, drones, drum and bass, or games music. With a weight of 1.3 gigabytes, the library contains more than 90 tracks that are high-quality 24 bit. The samples are provided in a variety of audio formats, including WAV as well as AIFF. What stands out in this collection are the desolate drones. They're programmed and spiced with just the proper amount of ambience and wash (i.e. large and spacey Reverbs) without sounding too distant. They are FXs are also fantastic packed with power and can be used for electronic music of the present era - especially dark and industrial. This is a great miniature collection of sci-fi music and I highly recommend it. At 10.95EUR it's hard to beat and won't break the budget.
