The most recent update to Red Giant includes updates to our Trapcode Magic Bullet, VFX, and Universe toolsets. Trapcode 2024 lets you develop realistically simulated thermal effects with the particular fluid dynamics simulation extension. VFX 2024 offers an entirely new realm of lighting control. It also includes a number of improvements to the well-known Real Lens Flares. In Magic Bullet 2024, color correction is much easier than before, with a variety of new settings giving you greater creative freedom. Furthermore, Universe 2024 offers a great variety of new and innovative presets.

TRAPCODE

Trapcode lets you experience robust 3D particle systems in After Effects. Use particle emitters to make fire, smoke, water, and other natural visual effects. You can also create stunning user interfaces and technological marvels using immortal particle grids and 3D-like forms. When you subscribe to Red Giant, get even more 3D geometric input options thanks to Cineware .c4d import. Utilize Cinema 4D files (including animation) in particle systems or create 3D models using After Effects.

MAGIC BULLET

Magic Bullet is a plugin that helps with finishing, color correction, and film-like effects. With its mighty real-time color graders, video denoising, and cosmetic retouching, you'll get everything you need to make your videos appear stunning directly on your timeline for editing.

UNIVERSE

The Universe is a collection of effects and video transition plugins for editors and motion graphic artists. Make your videos look authentic with retro and contemporary styles and create stunning glowing backgrounds, looping backgrounds, texts, glows, and more. The Universe offers more options and better results than any other feature in your host application.

VFX

VFX is a collection of plugins to track, keying cleanup, and visual effects composites within After Effects. VFX lets you create seamless composites and provides tools to speed up precise motion tracking lens distortion and removal of objects. VFX also has that if you're looking for beautiful lenses, glows, and distortion flares.

CORRECT COLOR

Magic Bullet Suite is a complete set of plugins that gives you everything you require to make your videos look stunning in the editing timeline. Make sure your footage is balanced by making firm color corrections. And then, you can go beyond color correction with precise simulations of lens filters and film stock. With both output and input color processing with Looks, Magic Bullet Suite is a perfect fit for the high-end workflow for color.

STYLIZE

Make your video look like the one like it's a Hollywood film. With the tools of Magic Bullet Suite, your footage can be instantly transformed into high-contrast and refined color palettes of high-budget films. With hundreds of customizable presets based on the most popular TV and movies, you can achieve stunning results in seconds.

REFINE

Balance skin tones quickly minimize wrinkles and eliminate the appearance of skin imperfections so your beauty can look its best. Magic Bullet Suite makes cosmetic cleaning quick and straightforward and provides natural results that look natural and unaltered.

CLEANUP

Ensure your footage is protected from the noise caused by shooting in darkness or with high ISOs. Magic Bullet Suite can clean the background noise while keeping the fine details of your image. After the color-grading process, Magic Bullet Suite can bring back some subtle texture and natural film grain, giving the final product a natural look that feels authentic and not processed.
