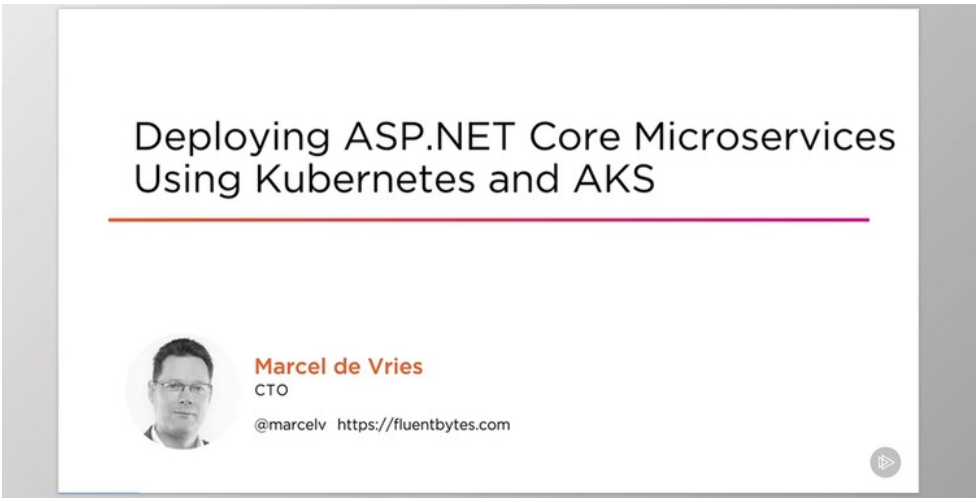
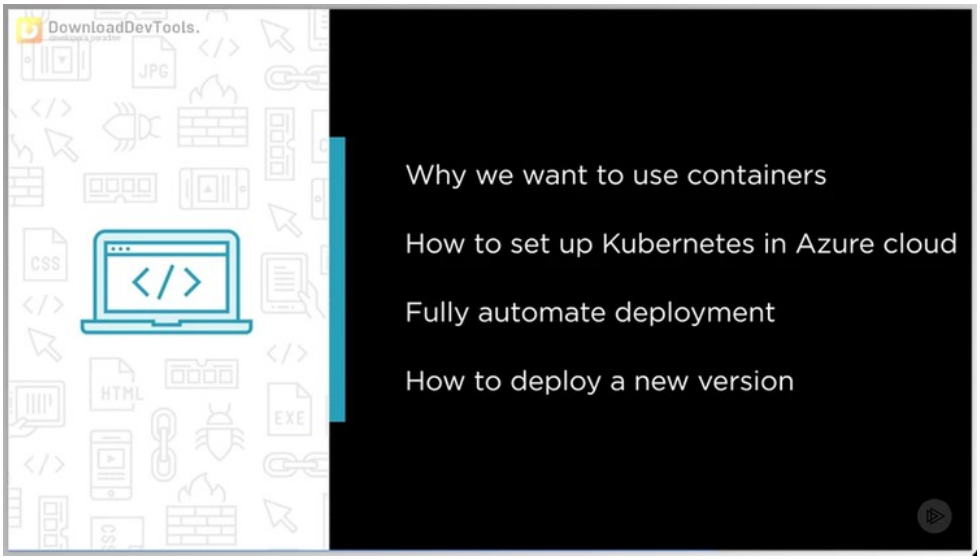
Deploying ASP.NET Core 3 Microservices Using Kubernetes and AKS - Marcel de Vries

2025-03-27 20:45:45 label 我要反馈 下载页面





Learn how to effectively deploy ASP.NET Core microservices on a Kubernetes infrastructure provided by Microsoft Azure Kubernetes Services (AKS) in this comprehensive course "". Gain insight into the advantages of containerizing microservices and leveraging Kubernetes clusters for efficient deployment. Discover how to set up and manage Kubernetes clusters on Azure, automate deployments to minimize downtime using Azure DevOps and GitHub, and seamlessly implement database schema changes without service interruptions.

By the end of this course "**Deploying ASP.NET Core 3 Microservices Using Kubernetes and AKS - Marcel de Vries**", you'll be equipped with the expertise in containers, Kubernetes, and deployment automation necessary to deploy ASP.NET microservices on AKS within the Azure Cloud successfully.

Deploying ASP.NET Core 3 Microservices Using Kubernetes and AKS Table of contents:

1. Course Overview (Duration: 2 mins)
2. Understanding Microservices and Containers (Duration: 44 mins)
3. Deploying Microservices to Kubernetes (Duration: 32 mins)
4. Automating Deployments with Azure DevOps and GitHub (Duration: 29 mins)
5. Updating the Database with zero downtime (Duration: 18 mins)
