After subscription, You can download it for free from here.

What is a Billboard mock-up?

A billboard mockup refers to a visual representation or template that simulates how a design or advertisement would appear on a billboard in a real-world setting. These mockups are valuable tools for designers, advertisers, and marketers to showcase and preview their designs before they are actually implemented on a physical billboard. They help in visualizing how the advertisement will look in a real-world environment and allow for adjustments or improvements before the final product is produced.

Using billboard mockups can save time and resources by providing a preview of the design without the need for physically producing a billboard. It also allows for quick iterations and adjustments based on feedback before the final design is implemented in the actual advertising space. Many online platforms offer free or premium billboard mockup templates for designers and advertisers to use in their projects.
