- 12. Again, click on the Settings button (top right corner)
- 13. Then Click on the Select Paste Settings
- 14. Enjoy applied presets

What is Golden Hour Lightroom Presets?

"Golden Hour" refers to the magical period shortly after sunrise or just before sunset when the sun's angle bathes the surroundings in soft, warm hues, creating a captivating and atmospheric ambiance. Photographers often cherish this time for its unique lighting quality, which imparts a golden glow to scenes and enhances the visual appeal of images.

In the realm of photography editing, Lightroom presets play a significant role. These presets are pre-configured settings in Adobe Lightroom that allow photographers to apply specific looks or effects to their photos with just a click. "Golden Hour Lightroom Presets" are specifically crafted presets designed to accentuate or replicate the warm and golden tones characteristic of the lighting conditions during the golden hour.

These presets typically fine-tune various parameters in Lightroom, including white balance, exposure, contrast, and color saturation. The aim is to recreate the warm and soft ambiance associated with the golden hour, transforming ordinary photos into captivating visual experiences. If you have a collection of images taken at different times of the day, applying Golden Hour presets can potentially elevate the mood and overall appearance, infusing them with a magical and ethereal quality reminiscent of the coveted golden hour light.
