Configuring Photoshop to work with actions.

- You must ensure that you are using the English edition of Photoshop. Each action was optimized for use with the English version only of Photoshop.
- Use the RGB Mode with 8 Bits color. These settings can be checked by going to Image->Mode.
- Make sure the option "Add copy" to copied layers and groups is on. This option is only available for Photoshop CS5 or later. Click on the "LAYERS" panel and go to "Panel Options ...",. Make sure that "Add a copy" to Copied Layers or Groups is on.
- Use 72dpi resolution or higher. The action won't work if you use a photo of less than 72dpi. This can be fixed by going to Image->Image Size and increasing the resolution value.

How do I combine my actions?

1. Open your photo
2. The first action is to play
3. Save the image as a PDF
4. Save the image previously saved.
5. The second action is now available
