Lac-Hydrin® Five [OTC]

Display complete list of interactions for an individual item by clicking item name. Add another item to analyze for potential interactions.

NOTE: This tool does not address chemical compatibility related to I.V. drug preparation or administration.

X

Avoid combination

D

Consider therapy modification

C

Monitor therapy

B

No action needed

A

No known interaction

More about Risk Ratings

X

Avoid Combination

Data demonstrate that the specified agents may interact with each other in a clinically significant manner. The risks associated with concomitant use of these agents usually outweigh the benefits. These agents are generally considered contraindicated.

D

Consider Therapy Modification

Data demonstrate that the two medications may interact with each other in a clinically significant manner. A patient-specific assessment must be conducted to determine whether the benefits of concomitant therapy outweigh the risks. Specific actions must be taken in order to realize the benefits and/or minimize the toxicity resulting from concomitant use of the agents. These actions may include aggressive monitoring, empiric dosage changes, choosing alternative agents.

C

Monitor Therapy

Data demonstrate that the specified agents may interact with each other in a clinically significant manner. The benefits of concomitant use of these two medications usually outweigh the risks. An appropriate monitoring plan should be implemented to identify potential negative effects. Dosage adjustments of one or both agents may be needed in a minority of patients.

B

No Action Needed

Data demonstrate that the specified agents may interact with each other, but there is little to no evidence of clinical concern resulting from their concomitant use.

A

No Known Interaction

Data have not demonstrated other pharmacodynamic or pharmacokinetic interactions between the specified agents.
