"Universal Complete 2.0 for Photoshop & Lightroom" appears to be a product or software package in the Lightroom category that provides presets for Adobe Lightroom. Lightroom presets are pre-defined settings that you can apply to your photos to achieve specific looks, styles, or color adjustments quickly and easily.

This product offers a convenient solution for applying presets to photos from various camera brands without the need for separate presets for each camera manufacturer. This means that the presets are designed to work universally across different camera types, which can save time and make the editing process more efficient.
