

## Artstation – TENTACLES – 40+ in ZBrush brushes and OBJs

2025-02-10 16:47:17    [label](#)    [我要反馈](#)    [下载页面](#)

**TENTACLES – 40+ in ZBrush brushes and OBJs:** Be sure you utilize Zbrush 2021.6.4 or later.

More than 40 Tentacles with different ZBrush brushes, OBJs, and brush styles strongly recommend watching the YouTube video below:

The most impressive tentacle pack is available to quickly build complex tentacled monsters, octopi, and other creatures. Super timesaver and idea generator - quickly spice up 3D sculpting/designing/conception, or even augment and change existing sculpts.

These are high-poly untextured sculptures. Example demo character(s) not included. Without sacrificing quality, the characters have been reduced to the maximum extent possible. Be aware that the most critical aspect of this pack - the curve brush function is exclusively Zbrush-based. Other software is also supported. I've included OBJs since certain people request them. They are straightly drawn out to allow them to be etymologized or baked, then rigged, animated, and curved. These are the source components available if you want to create duplicates of curves using Maya, Blender, etc.

- Zbrush Curve brushes 1 and 2. 19 tentacles, with an unchanging width and distinctive endpoints (heads) that are oriented from above and the one from the side, and you can select the angle you require.
- Zbrush Curve Brush 3 and four: 35 tentacles that have dropoffs along the curve that become smaller towards the top while the other is on the side to allow easy changing between two angles (note that some of the two brushes, in the beginning, appear in this one to provide an alternative falloff variant).
- Zbrush sub tool with all meshes from the source
- Zbrush sub tool file with all tentacles drawn out straight for retopology/baking/rigging in other software
- OBJs of all meshes that are the source
- OBJs of all tentacles drawn out straight for retopology/baking/rigging in other software
