Notion for Pattern Designers: Join me in taking part in the Surface Pattern Design class to explore the enormous potential and seamless capabilities of Notion to plan, organize, and design pattern collections.

The Notion is an excellent platform for coordinating creative ideas, mood boards, and color palettes. Additionally, it allows you to create a streamlined file system that ensures no of your carefully crafted designs are lost within the bowels of your computer.

In this class, you'll be taught:

- An Introduction to Notion
- How to make a Hub Page (home page) to showcase your collection of patterns
- How do you set up databases for your collection of patterns and individual patterns?
- How to make an example template that includes prompts for you to follow each time you design a patterns collection
- How do you make it look beautiful?
