"Imagenomic Portraiture" Samples:

Key features include the fill light function, which effectively brightens shadowed areas without affecting the overall exposure, resulting in enhanced clarity of facial features. The uniformity algorithm further contributes to this by smoothing uneven tones and eliminating imperfections.

Additionally, the tool saves time through its Portraiture AI, which intelligently retouches portraits by analyzing and applying smoothing where necessary. Lastly, the masking tool offers precise color masking, enabling users to focus the filter on specific subjects, thus maximizing its effectiveness.
