Live Streaming Package is remarkable After Effects template which contains whatever you need for your streaming channel. Greater than 35 scenes with an intelligent color controller will certainly guarantee you have a customized streaming channel in no time. It includes: starting screens, deal with cam, video game and conversation panels, client and follower alerts and banners, contribution signals, stinger change, intermission, reduced thirds, and also far more! Download currently to step up your streaming game. No plugins needed. Readily available in HD.
