Mixed Media Photoshop Action – GR 20449556: The Action was tested and running on Photoshop CS4 as well as CSS5, CS6, CC (CC 2014) and 2015.5, CC 2015.5, and CC 2017. 2018 CC, CC 2019,+

- Be sure to use your English version of Photoshop to use an Action on. All Sevenstyles Actions will only be compatible with Adobe's English version of Photoshop.
- Make sure you're using the latest version of Photoshop that supports the Action can work with.
- Check out the video tutorial and ensure that you can get your Photoshop file set up correctly. The tutorial's link is found in the 'Readme.txt File included within the download.
- Utilize high-resolution pictures using Action Action for the best results and to avoid mistakes. The ideal resolution for your photos is 2000px to 4500px.
- If you love this action but it isn't supported in the version you have of Photoshop You can download an extra version Photoshop to use this Action on. Once an Action is tested and is working with a particular version of Photoshop it will be in use for a lifetime.
- Make use of Jpeg pictures to execute an Action on. Other file formats like TIFF, BMP, PNG, PSD can cause issues with Actions as Photoshop removes features specific to different file types.
- If the Sevenstyles Action includes a brush (.abr) or patterns (.pat) or forms (.csh) file included in the file, then it should have been loaded in Photoshop before you can play the Action.
- Beware of using this Action for logos and clip art images since the lack of detail and contrast could result in errors.

Are you having problems with this Action?

- Make sure you have your files set up correctly, as illustrated from the very beginning of this video tutorial.
- Examine for resolution in your picture. If it's a low-resolution photo (<1000px) choose the length that is the most narrow of your image and then raise it to 2500px or higher. This will prevent mistakes and produce better results.

Customize effects

Photo effects can be combined to create different effects. Follow the steps below:

1. Then, run one Action on your photograph.
2. When you are satisfied with the final result Save your creation in a Jpeg image.
3. Stop Your Photoshop file and then open the image you saved.
4. You can now run another Action over your image! This will add the second effect over the first.
