Gif Maker v3.0 (Mac):

File Viewer for All is a versatile and robust application available on the iOS App Store that allows users to convert videos into GIF, WEBP, and APNG animations. This tool is designed to streamline the process of creating animated files from video content, making it easy for users to generate and view various animation formats. With its user-friendly interface, "File Viewer for All" caters to those looking for an efficient solution to manage and view their animated media files seamlessly.

- **Format Support:** Based on FFmpeg, the converter supports all popular video formats, enabling the conversion of videos to GIF, WebP, and APNG animations.
- **Video Clip Selection:** Offers precise video clip selection methods to capture desired moments.
- **Image Cropping:** Allows users to crop video frames to eliminate unnecessary parts, significantly reducing GIF file sizes.
- **High-Quality Conversion:** Ensures lossless quality in the output GIFs.
- **Customizable Output:** Users can set custom GIF image sizes and frame rates (FPS).
- **iCloud Sync:** Supports synchronization with iCloud for easy access across devices.
- **Embedded FFplay Player:** Features an integrated FFplay video player that allows users to play video from a specific timestamp with various navigation shortcuts.
