This collection provides a silky warm, inviting, and warm look to your photos. When I want an instant edit, I prefer using these presets for my run-and-gun photographs.

The Summer Days preset (a favorite of mine for quick editing) has been expanded to four distinct variations. I've also added the Carnival presets that give an aged look to your images.

These 10 presets keep skin tones and are suitable for portraits and landscapes.

This pack is an editing tutorial explaining how I modify my images by applying the preset.

As well to the tutorial on editing I've also added a Camera Basics Crash Course where I will go over the basics of camera settings, the rules of composition, and color theories.
