

## CData Drivers for Odoo v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:02:45   [label](#)   [我要反馈](#)   [下载页面](#)

offers a suite of robust drivers and connectors designed for seamless integration with Odoo ERP systems, enabling effortless access to Odoo data from various endpoints. These bi-directional drivers facilitate easy connectivity, allowing users to integrate Odoo data with BI, reporting, analytics, ETL tools, and custom solutions. With CData's intuitive solutions, organizations can harness the full potential of their Odoo data, leveraging it for informed decision-making and operational efficiency.

Experience unparalleled query performance and comprehensive access to Odoo data and metadata with **CData Drivers for Odoo**. These tools seamlessly integrate real-time Odoo data with BI, analytics, reporting, and data visualization technologies, providing users with the insights needed to drive business success. Whether analyzing sales trends, monitoring inventory levels, or tracking customer interactions, CData's drivers empower users to unlock the value of their Odoo data with ease.

Streamline Odoo integration with CData's developer-friendly tools and technologies, enabling agile application development and deployment. By simplifying integration through a data-centric model, developers can accelerate the creation of high-quality applications that leverage Odoo data effectively. Additionally, CData's drivers provide advanced data virtualization features, such as query federation and predicate pushdown, optimizing query performance and enhancing data access for developers and users alike. With **CData Drivers for Odoo** and connectors, organizations can seamlessly integrate Odoo data into their workflows, driving productivity and innovation across the enterprise.

**This package includes the following components:**

- Excel Add-In for Odoo

100% Virus FREE  
and Safe

Web & Script

Other

- Odoo ADO.NET Provider
- Odoo BizTalk Adapter
- Odoo Data Cmdlets
- Odoo FireDAC Components
- Odoo JDBC Driver
- Odoo MuleSoft Connector
- Odoo ODBC Driver
- Odoo Power BI Connector
- Odoo SSIS Components
- Odoo Tableau Connector

## Key Features of CData Drivers for Odoo :

1. Bi-directional drivers for easy connectivity with Odoo ERP data
2. Seamless integration with BI, reporting, analytics, ETL tools, and custom solutions
3. Unmatched query performance and comprehensive access to Odoo data and metadata
4. Support for popular database protocols including ODBC, JDBC, and ADO.NET
5. Integration with workflow automation tools such as BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more
6. Developer-friendly tools and technologies for faster application development
7. Virtual database abstraction on top of Odoo data
8. Support for advanced data virtualization features like query federation and predicate pushdown
