

ASDIP Foundation 5.0.0.1

2025-02-10 16:37:02 label 我要反馈 下载页面

ASDIP Foundation 5.0.0.1 is a leading structural engineering software designed to facilitate the design of various concrete footings, such as spread, strap, combined, and wall footings, by ACI 318 and CSA A23.3 standards.

How to design different concrete foundations?

You can use "ASDIP Foundation 5.0.0.1".

It simplifies complex calculations through an intuitive graphical interface, ensuring design optimization and code compliance.

The software generates professional reports and provides extensive documentation and examples for user guidance. It supports a range of load cases and stability analyses and features a Design Manager tool for preliminary footing design.

ASDIP Foundation integrates with other industry software like ETABS, and allows load import/export via Excel, with future integrations planned for CAD and Revit platforms.

This software enhances workflow efficiency and reliability in footing design projects.
