SOUND EFFECTS

Pro Sound Effects Cinematic Dread (WAV): Enter the realm of cinematic terror with the expertise of legendary sound designer and composer Alan Howarth, renowned for his contributions to iconic films such as Army of Darkness, Total Recall, and Bram Stoker's Dracula. The Cinematic Dread library is a curated collection featuring eerie drones, textured atmospheres, and a plethora of ready-to-use sound effects designed to infuse instant anxiety and otherworldly energy into your fantasy, horror, and sci-fi projects.

Immerse yourself in the world of suspense as Alan Howarth, a seasoned veteran in horror/sci-fi sound, conjures terror with dark drones and evolving ambiences. Timed perfectly for Halloween, the Cinematic Dread package unleashes 74 foreboding sci-fi and horror sound effects, including buzzy alien swells, evil choral winds, swirling vortexes, ghostly underwater hums, demonic resonance, and more.

Bring depth and texture to your designs with sounds crafted directly from the imagination of a master in the horror/sci-fi genre. Alan Howarth's influential expertise in both sound design and composition, showcased in notable credits such as the original Star Trek films and collaborations with John Carpenter (Halloween II, They Live, Escape from New York), ensures that this collection provides the ideal mysterious and sinister soundscapes for all your supernatural audio needs.

Each sound file within this library is embedded with rich metadata, streamlining your search for the perfect sound effect with quick and intuitive functionality. Elevate your creative endeavors with detailed descriptions, offering realistic depictions and emotional interpretations for each recording.

Incorporate the cinematic brilliance of Alan Howarth into your projects and explore the depths of fear and tension with the Cinematic Dread library.

Highlighted Features:

- 74 Sound Effects: Dive into a diverse collection of 74 meticulously crafted sound effects, each designed to enhance the auditory experience of your projects.
- High-Quality Audio: All sound effects are presented in 24-bit/48kHz broadcast .wav files, ensuring top-notch audio fidelity for your productions.
- Royalty-Free Usage: Enjoy the freedom to use these sound effects without any limitations. They are 100% royalty-free, allowing you to incorporate them into your creative works without concerns about licensing or usage restrictions.
