GET THE PERFECT LOOK. QUICKLY

I needed to make a Comprised library of LUTs you'll actually use. Other packs out there now have 1000 LUT Packs and that I do not know about you, but I do not have enough time to look through 1000s of LUTs.

And that is why I created The Essential LUT Package. Simple drag and drop the desired intensity over your LOG footage, fix your vulnerability, and you have immediately saved yourself hours of color grading.

No more hunting, no longer wasted time.
