The **JRO Component Suite by Winsoft** offers Delphi and C++ Builder components tailored for creating, modifying, and synchronizing replicas through JRO (Jet and Replication Objects). As an integral part of the Adonis Component Suite, it leverages the Microsoft JRO library, granting direct access to JRO objects. Compatible with Delphi/C++ Builder versions 5 through 12 and Lazarus 2.2.6, this suite includes the source code in the registered version, allowing for customization. Moreover, the distribution of these components in applications is royalty-free.

Key Features of :

- 1. Utilizes the Microsoft JRO library for enhanced functionality.
- 2. Offers direct access to JRO objects, streamlining interaction.
- 3. Compatible with Delphi/C++ Builder versions 5 through 12 and Lazarus 2.2.6.
- 4. The registered version includes the source code for customization.
- 5. Components can be seamlessly distributed in applications without royalty fees.
