The **Smart Camera View 3.93** for 3ds Max 2024 is a script designed to enhance the default Camera View in 3ds Max, offering advanced functionalities to streamline camera setup processes.

This upgraded version, built from scratch with a new algorithm and workflow, prioritizes speed and performance while introducing innovative features.

How to set different parameters, separate rendering settings, and camera alignment options in 3D Max?

You can use "Smart Camera View " to design your project.

Key features include seamless synchronization between the camera list and viewport, automatic resolution adjustments for each camera, batch renaming and parameter adjustments for multiple cameras, individual render resolution settings, camera alignment options, and streamlined batch rendering. This script aims to save time and provide a user-friendly tool for artists working with diverse camera requirements.
