Delphi   VCL   Components

Winsoft JSON Library offers comprehensive support for JSON data handling, catering to various development needs. With full JSON support for literals, numbers, strings, arrays, and objects, developers can effortlessly encode and decode date/time information, ensuring robust data management capabilities. The library boasts customizable output options, empowering developers to tailor JSON output to their requirements.

Featuring in-memory and streaming JSON parsers and generators, provides flexible solutions for processing JSON data efficiently. With cross-platform compatibility, including Windows, macOS, iOS, Android, and Linux support, developers can

seamlessly integrate JSON functionality into their applications across various operating systems.

Compatible with Delphi/C++ Builder versions 6 through 12 and Lazarus 2.2.6, this library ensures broad compatibility with popular development environments. Moreover, including source code in the registered version allows developers to customize and extend functionality. With royalty-free distribution rights, developers can confidently deploy their applications without additional licensing concerns, making the **Winsoft JSON Library** a valuable asset for JSON data handling in diverse application scenarios.

Key Features of **Winsoft JSON Library** :

1. Full support for JSON data types, including literals, numbers, strings, arrays, and objects
2. Encoding and decoding of date/time information
3. Customizable output options for tailored JSON formatting
4. In-memory and streaming JSON parsers and generators for efficient data processing
5. Cross-platform support for Windows, macOS, iOS, Android, and Linux
6. Compatible with Delphi/C++ Builder versions 6 through 12 and Lazarus 2.2.6
7. Source code included in the registered version for customization and extension
8. Royalty-free distribution rights for seamless deployment in applications
