Unity Asset - Survival Animations v1.0: Introducing a comprehensive set of animations tailored for survival games, encompassing various activities such as gathering, building, fishing, skinning/tanning, campfire management, and more.

This asset pack enhances the immersive survival gameplay experience in Unity environments. With a total of 89 animations, including various actions like crafting, campfire maintenance, fishing techniques, and resource gathering, this pack offers a diverse array of motions to breathe life into your game characters.

Whether your players are constructing shelters, foraging for resources, or engaging in primitive fishing methods, these animations provide dynamic visuals that enrich the gameplay experience.

Compatible with Unity's render pipelines, including the Built-in Render Pipeline, Universal Render Pipeline (URP), and High Definition Render Pipeline (HDRP), this asset pack ensures seamless integration into different project environments. Please note that while this pack includes a wide range of animations, it does not feature gameplay blueprints or character models in promotional materials.
