Apeaksoft Video Fixer v1.0.22 (Win, Mac- v1.0.16):

Apeaksoft Video Fixer is a tool designed to restore corrupted, damaged, or unplayable videos to their original quality.

It supports videos from various devices, such as cameras, smartphones, GoPros, and drones, and allows users to preview the repaired video before exporting.

The software currently repairs videos in MP4, MOV, and 3GP formats, including 4K and 8K footage, with plans to support additional formats in the future.

The repaired video matches the quality of a provided reference sample.
