is a powerful solution for scanning from local scanners directly to a terminal server, simplifying remote desktop scanning for any business. With TSScan, you can scan documents just as you would on your local machine but from any remote desktop, terminal server, VDI, or Citrix environment. It provides seamless compatibility with your current setup, allowing you to centrally archive and manage scanned documents without needing complex software configurations or extra drivers on the server.

Using advanced compression technology and Microsoft Virtual Channel, **Terminalworks TSScan** transfers high-quality images quickly and securely over any network connection. Scans retain their original quality, making it a great choice for sectors like healthcare, where document clarity is essential. TSScan also includes a standalone application for added flexibility, letting you scan to common formats like JPEG, BMP, TIFF, or directly to PDF, saving time and resources by eliminating the need for additional software.

With **Terminalworks TSScan**, you get a streamlined scanning experience that requires no extra setup and supports various imaging devices, including TWAIN and ScanSnap scanners for easy integration. Whether you're working on a small network or a large enterprise setup, TSScan optimizes document handling, ensuring fast, encrypted transfers and high-quality results that meet professional standards.

### Key Features of Terminalworks TSScan :

1. Seamless Remote Scanning: You can use your local scanner directly on a terminal server as if it were local without installing extra drivers.
2. Standalone Scanning Application: TSScan offers a built-in application, making scanning easy without third-party tools.
3. Multiple Format Support: Scan to TIFF, JPEG, BMP, or PDF for flexible document management.
4. Fast, Secure Transfers: Using Microsoft Virtual Channel technology, TSScan ensures high-speed, encrypted network scanning.
5. High Image Quality: Balanced default settings provide both speed and quality, with options for fine-tuning.
6. Ideal for Healthcare: Securely scan and centralize patient records on a terminal server without losing image quality.
7. ScanSnap Compatibility: Works seamlessly with TWAIN and ScanSnap devices, requiring no extra drivers or server setup.
