

Blendermarket – Starship Generator v1.1.0

2025-02-10 17:15:44 [label](#) [我要反馈](#) [下载页面](#)

**Blendermarket – Starship Generator v1.1.0:** Include sci-fi spaceships from various sources to your scene using Blender or export the images to other applications like Unreal Engine. Concept developers and artists who are looking to create backgrounds 3D models to be used in animation, art games, or as inspiration.

Tutorial Videos:

- Installation
- Quick Start
- Materials
- Exporting into other Applications (Substance Painter Unreal Engine)
- Use Custom Objects
- Include More Details about the Displacement Material
- Adding the Window Lights Material
- Handling Islands
- Problems with Smoothing
- Getting Ready for 3D Printing or Sculpting
- Reducing Geometry
- Improving Performance
- Find Good Designs using Silhouettes
- Adding Boosters
- Duplicating Starship Objects

Limitations:

- The add-on cannot make any spaceship imaginable, but it is focused on making long-range ships that resemble those of Sulaco in Aliens and that of the Rocinante of The Expanse.
- Ideal for background shots with a medium or dark tone If no other modeling or sculpting is applied.
- Created to be as efficient as possible, however, performance can vary from computer to computer when changing parameters.
- It could be that you have to click through the seed values to determine which patterns you'll get.
- Add a Starship model to your scene using Blender's Add Mesh Menu.
- Make various designs by changing the seed number of a single.
- Modify the Geometry Nodes that are set up in Blender. There is no code to customize.
- Pick the panels that are added onto the 3D model or the integrated Cycles displacement model.
- Modify the material to increase or decrease the density of the object.
- All modifiers must be collapsed to make the standard 3D model.
- The design was created with the concept of design in mind to ensure that the designs are visually attractive.
- Check out the example .blend configurations for the file, including the complete blueprint render setup thrown here.
