

## Blender Market - Not Important Studio - Nis Light Pack v1.1

2025-02-10 16:51:48    [label](#)    [我要反馈](#)    [下载页面](#)

**Blender Market - Not Important Studio** stands out from the crowd with its unique approach to creating life-like and stunning 3D scenes with its lighting packs. With Martin's rich background in luxury photography, this pack effortlessly captures over 50 incredibly detailed emulsion lights hailing from the world's most recognized brands, such as Broncolor, Profoto, Chimera, and more. These emission-based lights serve a purpose far beyond simple reflections. With emission-based lighting, users can change and enhance the lighting as they see fit or need. Coming from the world of luxury photography, Martin hopes to transform the brash world of 3D product rendering, artistic masterpieces and professional set scenes which make up project lighting and bring ease to pierce the highly complex world of photorealism, the goal of every designer.

- **Lighting Layers:** Light modifiers act as adjustable field positives, enabling control over softening and shaping the light's softness and intensity.
- **Emission Strength:** Users can fine-tune the brightness levels of the light set while still maintaining flexibility to focus on the details of the scene.
- **Blur Amount:** Effects like blur enable softening and harsh balancing of the reflection's shininess, alongside adding control over the setting tune.
- **Gamma:** The temperatures of the light are set for visual perfection, such as contrast and turning up the blink level. They are great when paired alongside blur settings.
- **Colour Sliders:**Set the light warmth, tint (shift from green to magenta), and gel factors for any colour you wish.
- **Rotation:** The shader light can be rotated to align with the object's position even when on a track, freeing space for other actions.
- **High-Quality Assets:** The most detailed textures are available in 8K, 6K, 4K, or 2K. Medium-format photography gives 100MP to fit everything within the frame.
