### Fuse Audio Labs VREV-63 Surf Spring Reverb v1.0 (Win):

#### SURF SOUND, INC.

- Introducing the VREV-63, a dynamic revival of the legendary tube-driven spring reverb that defined the surf guitar sound of the sixties – a true godfather of sonic waves! When plugged in front of an amplifier, this enigmatic box unleashes the iconic drippy and splashy tones, sparking inspiration across genres like reggae, dub, garage, rockabilly, jazz, and spaghetti western. Immerse yourself in the world of extended and captivating reverb tails that redefine musical expression.

#### GENUINE VIBE

- Control the reverb intensity and decay time with precision using the Dwell knob, dictating how forcefully the springs respond to the input signal. Fine-tune the treble frequencies to achieve the perfect brightness with the Tone control. The lush sound is further enriched by the distinctive tone suck effect, seamlessly switchable to accommodate high frequencies, thanks to the authentic emulation of the tone and mixer circuits.

#### MODERN UPGRADES

- Staying true to the original, the VREV-63 embraces enhanced flexibility through popular modifications. Engage the C10 capacitor mod for a deeper and more resonant reverb sound. Experiment effortlessly with tube rolling between a NOS 6K6 and a hotter 6V6. Choose from three unique spring tanks to tailor the reverb to your liking. Enjoy kicking the reverb all night long, knowing your precious hardware is safe from wear and tear.

#### VERSATILE SONIC ADVENTURES

- While the VREV-63 boasts a juicy reputation in surf music, its sonic prowess transcends beyond surf expeditions, twangy splatter sounds, or experimental freak endeavors. Time has proven its ability to sound uniquely beautiful and inspiring on synths, vocals, strings, and a myriad of other instruments. Take it for a ride, and let the springs call you to explore new musical horizons!
