Cavalry 1.5.5 (WIN): Powerful 2D Animation Software. Created by animators, this software allows 2D animation to be more intelligent, accessible, faster, and easier to create for animators. Real-time design for mobile, advertising web, data visualization broadcast and user interface, generative art games, experiences, and much more.

Gfx plugin details of Cavalry 1.5.5 (WIN)

The product is in the **Software category**, for more information about this post you can click on the home page link in the sidebar.
To search for similar products to Cavalry 1.5.5 (WIN),

- Supported OS: Windows 11, Windows 10
- RAM (Memory) 2 1 GB RAM (4 recommended GB)
- The Hard Disk space is free if you have 200MB or more

General

- Make a New Edit and then add it to the Group menu item.
- The new shape is called Swap, a menu option that lets you swap fill.

Scripting

- A new disconnectInput() is added to API.
- The disconnectOutputs API has been updated. () is added to the API.
- New onLicenceUpdated Application Callback.

Enhancements

- Text Backgrounds are now compatible with the final token in the Specific Indices input.
- Text Backgrounds now support negative values for Specific Indices to select the last, penultimate, third-to-last, paragraph/line/word/character.
- The ability to enable or disable Fill/Stroke on specific Layers simultaneously is now possible. Be sure to open the Fill/Stroke tab before selecting any other layer (clicking on the tab can switch the layer selection).
- Connections between Attributes and other compositions are now labeled as these.
- Eliminating Layers by dragging them within the Time Editor is now supported for the first time.
- When you add Random, Oscillator, or Stagger behaviors to attributes via the right-click > > Add Behaviours workflow, Cavalry will try to be more beneficial in some situations. Examples:
- I am adding a Random to the normal Ellipse's radius. x will increase the Maximum of the Random at 100 (the Ellipse's width).
- It adds an Oscillator to the default Ellipse's radius. x will change the Oscillator's Minimum value to -100 and its Max to 100.
- Adding a Random Index of a Color Array with four colors will change the Maximum Random value to four.

- Simple Versioning
- Design in real-time
- Playground for Creativity
- End to End Workflow

What is Cavalry?

Cavalry is a real-time motion design tool that allows users to create animations, graphics, and interactive experiences with a focus on speed and interactivity. It was developed by Cavalry Media Ltd. and is designed to streamline the animation and motion graphics creation process.
