Unreal Engine - Blueprints FPS Template v5.1: Introducing FPS Template, our reimagined and remastered version of the full-body FPS template originally provided by Unreal. Based on the Lyra locomotion system, this template has undergone significant upgrades and reworks to offer a more polished and feature-filled experience. Serving as an ideal starter project, the template has evolved from integrating with LyraStarterGame to incorporating other multiplayer FPS templates, making it a versatile solution for game development.

- Full-body support with procedural look and sway
- Crouch, jump and turn in-place functionality
- Linked Animation Layers for Pistol, Rifle, and Shotgun
- 100% Blueprints
