1.
2.

AutoDesk Navisworks Manage 2025 (WIN) is a comprehensive review and coordination software designed to enhance Building Information Modeling (BIM) project delivery.

How to create 4D simulation using the TimeLiner tool?

You can design your own project from "AutoDesk Navisworks Manage".

It enables the visualization and consolidation of design and construction data within a single federated model, facilitating the identification and resolution of clash and interference issues before construction begins, thereby saving time and minimizing rework.

"AutoDesk Navisworks Manage" Samples:

Key features include data unification for improved collaboration, clash detection, integration with the Autodesk Construction Cloud, 4D and 5D simulations for schedule and cost management, the TimeLiner tool for visualizing project progress, material quantity capture, preconstruction analysis, and seamless integration with other Autodesk tools like Revit.
