Blender Market – Speedretopo v3.6.5: Meet Speedretopo, the game-changing tool designed to simplify and enhance your retopology process in Blender. Whether you're a seasoned pro or just starting, Speedretopo empowers you to create clean topologies effortlessly with efficiency and ease.

This tool automates the tedious tasks associated with retopology, freeing up your time to focus on the creative aspects of your modeling. With a single click, generate a base mesh that serves as a foundation for further refinement and adjustments. What makes Speedretopo a must-have for Blender artists?

Experience the power of Speedretopo and revolutionize your Blender retopology workflow. This versatile tool works seamlessly from Blender 2.7 to 3.6, with updates provided for the latest official builds. Customization is at the core of Speedretopo. Tailor the settings and tools to match your retopology preferences. Choose vertex tools, Face tools, Bsurface, and Polybuild to suit your needs.

Let Speedretopo handle the automation, allowing you to concentrate on your work. It automatically adds modifiers, providing valuable tools like Bsurface, loop tools, and custom tools like Relax and Center Vertices. Optimize performance by decimating the reference object, and utilize tools like Bsurface, loop tools, and custom tools (Relax Tool, Center Vertices, etc.) to edit your retopology effortlessly.

Custom tools like Center Tools and Freeze Tools are designed to make your retopology experience smoother and more efficient. Easily edit shading to achieve the desired visual result. Speedretopo puts customization at your fingertips, allowing you to tailor your retopology experience to your unique style and preferences. Revolutionize your workflow with Speedretopo and enjoy a new efficiency level in Blender Retopology.

- One-click retopology for a streamlined workflow
- Automated modifier updates for hassle-free retopology
- Custom tools such as Relax, Align to Center, and more
- Center tools for precise mesh alignment
- Freeze tools for maintaining control over your retopologized mesh
- Shading tools for enhanced visualization and refinement
- Customizable menu and pie menu for optimal accessibility
- And much more!
