

CData Drivers for YouTube Analytics v24.0.9111 (11 Dec 2024) All Platforms + License Key

2024-12-18 23:02:00 label 我要反馈 下载页面

CData Drivers for YouTube Analytics provide seamless access to YouTube Analytics data, facilitating effortless integration with a wide range of BI, Reporting, Analytics, ETL Tools, and Custom Solutions. Whether seeking real-time data insights or comprehensive analytics, our connectors ensure that YouTube Analytics data can be accessed from anywhere, enabling informed decision-making across various platforms and applications.

offer robust, reliable, and secure data movement from BI and analytics to ETL, replication, and warehousing. Connect your RDBMS or data warehouse with YouTube Analytics to enhance operational reporting, optimize query performance, and support data governance initiatives. With support for popular database protocols and wire-protocol interfaces, managing YouTube Analytics data becomes seamless across diverse database management applications.

Experience streamlined workflow and automation with **CData Drivers for YouTube Analytics**, connecting YouTube Analytics data to popular data migration, ESB, iPaaS, and BPM tools. Developers benefit from a data-centric model that simplifies integration, allowing them to build higher-quality applications faster. Additionally, our drivers provide a virtual database abstraction layer atop YouTube Analytics data, supporting advanced features like query federation and predicate pushdown for enhanced data virtualization capabilities.

This package includes the following components:

- Excel Add-In for YouTube Analytics
- YouTube Analytics ADO.NET Provider
- YouTube Analytics BizTalk Adapter

标签

- Web & Script Other

- YouTube Analytics Data Cmdlets
- YouTube Analytics FireDAC Components
- YouTube Analytics JDBC Driver
- YouTube Analytics MuleSoft Connector
- YouTube Analytics ODBC Driver
- YouTube Analytics Power BI Connector
- YouTube Analytics SSIS Components
- YouTube Analytics Tableau Connector

Key Features of CData Drivers for YouTube Analytics :

1. Seamless integration with BI, Reporting, Analytics, ETL Tools, and Custom Solutions
2. Real-time access to YouTube Analytics data from anywhere
3. Swift and hassle-free connectivity for BI, analytics, reporting, and data visualization platforms
4. Unmatched query performance and extensive access to YouTube Analytics data and metadata
5. Robust, reliable, and secure data movement for ETL, replication, and warehousing
6. Optimization of operational reporting, query performance, and data governance initiatives
7. Support for popular database protocols and wire-protocol interfaces
8. Streamlined workflow and automation with connectors for data migration, ESB, iPaaS, and BPM tools
9. Simplified integration for developers, enabling faster application development
10. Virtual database abstraction layer for YouTube Analytics data with advanced data virtualization features such as query federation and predicate pushdown.
