Unreal Engine - Characters Modular Mercenary - Female Humans - Fantasy Collection v5.01: Add a mercenary to your game with this fantasy human pack! This collection provides an array of human characters, heads, weapons, outfits, and hairstyles for your fantasy game. The pack features four unique head and hair variations, along with five high-quality weapon assets. All pieces include high-quality physics assets; the hair will bob, and the outfit will sway. Cloth physics has been configured where appropriate.

These characters are entirely modular and include 8 layers of mask control to create or randomize the color and style to your taste. High-quality master materials are included for high-quality skin, hair, and eye rendering. This pack supports version 5.01 and above only. Version 5.01 has deprecated many blueprint functions and fixed a bunch of retargeting tool errors present in 5.0, maintaining a richer feature set and a more efficient update pipeline. We will no longer be supporting earlier engine versions.
