

Aescripts – Automation Toolkit v1.0.3.7

2025-02-10 17:11:13 [label](#) [我要反馈](#) [下载页面](#)

A visual scripting tool For After Effects which may be delegated to custom switches without needing to code anything! Fundamentally, an "Anything You Desire!" button maker!

What's Automation Toolkit?

Automation Toolkit is a tool that lets you automate.

Many time-consuming jobs, It permits you to make a variety

Of script-like works, known as automation.

An automation functions like some other After Effects

Thus, even when you're needing a script that does not exist,

Today for the very first time you've got the capacity to make yourself precisely what you need it, without needing any knowledge about programming...

Automation Toolkit includes an automation editor (such as creating

And Tracking automation) and also an automation toolbar (such as conducting the automation).

Why Automation Toolkit?

If you had a Notion of automation which could save time up however

You Do not have the wisdom of how to code it.

You Understand how to code it you can discover to code it this automation Is not desperate enough to be worth all of the hassle and time in coding.

Automation Toolkit was developed to make your life simpler by Developing a codeless environment so that you can concentrate on making your automation Without needing to understand any scripting language or proceed to some other bit of software. Even if You Understand How to code you'll wind up with fun"programming" Within this errorless atmosphere.

Characteristics:

Dynamic & easy UI

Automation Toolkit user Interface made to Immediately Alter its visual components to reveal the choices you can use so that you can Overlook error messages and unnecessary confusion.

No code!

Automation Toolkit gets the energy of After Effects Scripting available for non-coder users.

There's no requirement to understand any programming language to create automation even though Understanding programming can assist in getting started and producing more complicated automation.

Discuss your automation along with other folks!

You can discuss your automation with your coworkers who Possess a replica of Automation Toolkit therefore that their job will likely be productive too!

Powerful & flexible

Automation Toolkit is made to be as adaptable as it could be So that you may create quick and easy automation or complicated and quite sophisticated automation.

Categories & icons

Organize your automation in custom classes and place a Customized icon for every button!

There are several methods to personalize the look to satisfy your style.

The infinite number of chances

Automation Toolkit made to make your ideas a reality.

You can create an infinite number of tools that can match your workflow, mend Your issues, or simply will be the attribute you desired.

Capabilities:

Loop

The loop point would be to undergo things and operate the same Operations on all of them.

The loop allows one to conduct operations with the layers, including compositions, footages, keyframes.

You can add an automation line in the loop so as you conduct the automation the Loop will operate it has automation lines on most of the items that are specified.

Should

Occasionally, We Must perform Unique automation predicated on Various ailments.

The should automation lineup purpose would be to add logic into Automations so that you can create automation that takes effect only on particular items.

Establish

place the value of any home Which Can Be changed by the user. First You Need to define which property to place and then define what the Brand new value of the property ought to be.

Establish can conduct mathematical calculations of several possessions or spiritual values.

Action

The activity automation lineup will perform a job on Layers/Items/Keyframes.

The functions allow performing manipulations that not linked to any house,

For instance - replicate, delete, delete, and much more.

Message

The concept automation lineup shows a window using a Specified message and an OK button.

Message can reveal the Majority of the possessions of Layers/Project Items/Keyframes Together with a custom-made text.

A message may also be utilized to make a record of text information from Particular properties.

Listing box

The listing box automation lineup shows a window using a Given set of messages along with an OK button.

List Box can display Just a message automation lineup (which should Be put to"amount to record") along with a custom-made text.

List Box messages may be reproduced as plain text messages into some other program.

Factor

Factor automation line may contain every Kind of item:

Number, Text, Text Layer, Item, Property, Boolean.

Variable Aim Is to conserve custom worth of any Sort of item

For subsequent use.

Some attributes may be accessed only in a loop

Therefore, if you would like to utilize this value beyond this loop

You need to store it within a factor.
