3D-kstudio Sweep Profile PRO 1.01.17 FOR 3DS MAX:

The ability to design architectural profiles quickly and with accuracy is an invaluable asset. One tool to facilitate this can be found in the Sweep Pro script from Kstudio.
This tool lets users easily design architectural moldings by modeling a 3D image of an outside or inside.
The PRO version comes with 37 pre-designed architectural profiles.

How to create handrails and moldings in 3D?

You can use "3D-kstudio Sweep Profile".

Where can I download the product?

After subscription, You can download it for free from here.

Features and Functionality

The principal function of Sweep Pro is its ability to provide an efficient and fast method to create architectural profiles with its Sweep modifier.
The pack comes with pre-designed Architectural profiles (10 for the free version and 37 for the PRO version) and provides the users with an excellent foundation to begin.
However, the features don't end at that point; users can add new profiles to the scene or by adding profiles from a certain folder.
Additionally, the tool offers an extremely convenient feature to alter the dimensions of the profile at any time.

Main Features

- Architectural profiles can be updated or created in just one click
- Setting profile dimensions
- Favorites profiles
- The library can be updated by adding profiles of users to the library
- Utilize selected edges of Editable Poly[PRO Use selected edges from Editable Poly [PRO
- Studio to render profiles [PRO Studio for rendering profiles [PRO
- Profil's pivotal alignment (PROHTML0's pivot alignment [PRO
- simplified Chinese, French, Spanish, German, and Japanese localizations [PRO Simplified French, Spanish, German, and Japanese localizations [PRO

All shapes of the molding are in one bundle. The bundle includes 27 profiles (more than 1200 profiles) to create handrails, moldings, and other models in 3D Max with the Sweep.

What is 3D-kstudio Sweep Profile?

3D-kstudio's "Sweep Profile" is a plugin for 3ds Max, a popular 3D modeling and rendering software. This plugin is designed to help 3D artists and designers create and manage custom profiles for architectural and interior design elements in their 3D projects. Profiles typically include details like moldings, baseboards, trim, and other decorative elements used in architectural visualization.
