

CData Drivers for Microsoft Teams v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:01:45 [label](#) [我要反馈](#) [下载页面](#)

CData Drivers for Microsoft Teams provide comprehensive connectivity solutions, enabling seamless integration of live Microsoft Teams data into diverse applications and systems. With these drivers, users can effortlessly access real-time Microsoft Teams data from BI, analytics, reporting, ETL, and custom applications. This facilitates efficient data analysis, reporting, and visualization, empowering organizations to derive valuable insights and make informed decisions.

These drivers extend the functionality of ETL tools, enabling efficient data movement, replication, and warehousing. Organizations can leverage Microsoft Teams data for operational reporting, query offloading, performance enhancement, data governance, disaster recovery, and more. Moreover, support popular database protocols like ODBC, JDBC, and ADO.NET, simplifying data management tasks and ensuring compatibility with various database management applications.

Developers benefit from the simplified, data-centric model the CData Drivers provides, accelerating application development and enabling high-quality solutions in less time. Integration with workflow and automation tools streamlines data migration, enterprise service bus, integration platform as a service and business process management tasks. Additionally, **CData Drivers for Microsoft Teams** offer advanced data virtualization features, enhancing query performance and data accessibility for enhanced productivity and decision-making across the organization.

This package includes the following components:

- Excel Add-In for Microsoft Teams
