To search for similar products to Maple Grove – falling leaves overlay,

- PSD file that has three categories (leaves with focus, background, and background)
- Files in PNG format (transparent background) (transparent background) - for instance, for those who don't have Photoshop
- suitable for photos of up to 3300 x 5000 pixels and smaller
- 300 dpi - great for prints
- more than 60 leaves in various sizes and colors, as well as more than 60 leaves of different shapes and colors
- Each leaf should be a distinct layer - DESIGN your own story

Very simple to make use of!

- Simply place the overlay on top of your image and enjoy.

How to create a PSD document (only to be used with Photoshop):

- Each leaf is on its own layer. You can design YOUR OWN scene and move using each leaf individually.
- 3 distinct groups - the focus of leaves, the foreground, and the background - make having fun more enjoyable
- Combine layers, and that's it!

How to open a PNG file (works with all editing software):

- Use your soft brushes to remove the overlay areas that are not needed (over the face, etc..)
- Layers are joined and that's all it takes.

What is Maple Grove – falling leaves overlay (PSD, JPG)?

PSD Format: PSD files are native to Adobe Photoshop and often include layers, allowing for easy customization. In the context of a falling leaves overlay, a PSD file might contain individual layers for leaves, allowing users to adjust their placement, opacity, or other properties.

JPG Format: JPG is a common image format used for photographs. In the context of an overlay, a JPG file might provide a flattened version of the overlay without editable layers. It's typically used as the final version for easy application to images.
