Solidity and NFT for Beginners: If you answered yes to one of the following questions, This course is suitable for you!

Are you curious about learning how to design your very custom smart contract?

Are you looking to learn more about the basics of Solidity?

Do you wish to market NFTs that you've made by yourself?

As an entrepreneur, Do you wish to use blockchain technology to improve the way you run your business? However, you aren't sure how to begin.

Learn how to make the smart contract and NFT of your dreams by usingSolidity along with Ethereum. Ethereum blockchain. This course will give you an in-depth overview of the Solidity programming language and the Ethereum ecosystem. You'll be taught how to design and implement smart contracts on Ethereum. You'll also learn how to deploy smart contracts on the Ethereum network and develop and market your own unique NFTs. Suppose you're a developer wanting to start working with Ethereum or an entrepreneur seeking to use blockchain technology to improve the way you run your company. In that case, this program will be of interest to you. With practical exercises and real-world scenarios, you'll gain the expertise and understanding you require to succeed in cryptocurrency and blockchain. Join now to begin developing your blockchain!

This course was designed for people without prior knowledge of NFTs and Solidity. We'll begin with the basics and go over the basics of NFTs and their applications. We'll dive into solidity, the Solidity programming language, right from scratch. In the next course, we'll design our ERC721 NFT token. We'll also learn about IPFS and how to sell and publish our NFT through the open sea. At the end of this course, you'll be able to build a solid foundation on NFTs and Solidity and be capable of creating and selling unique NFTs through the cryptocurrency blockchain.

The lessons you'll be learning:

- Learn About Blockchain & NFT
- Learn About Smart Contract
- Learn Solidity programming from scratch
- Create and market NFTs.
- Discover how you upload your NFTs onto IPFS
- Learn how to offer your very own NFT through Opensea.
